SAM RANDALL for President! Well, that is all right. The Democrats must have a Sam, and having got through with Sam TILDEN, and SAM Cox having been measured for the place and found too small, why not take Sant RANDALL. He has been nominated out in Iswa already.

THE Republican party may have committed eners in policy, but none of these have ever attained an enormity that would justify the handing of the Gevernment over to · Confederate Democracy, that they may be corrected. The people should not lose sight of that one point. It is of necessary to destroy the entire fabric to patch rents of trifling importance

THE San Francisco Eccuing Post views the political situation through the eye of good sense. It says: "Friends are always "better counsellors and assistants than enc-"mies, especially in politics, and where the " differences are so radical and irreconcilable as those that must and do exist between "the Confederate Democracy, the Republicaus, and Nationalists."

DELAWARE, Maryland, Georgia, Kentucky, Texas, and West Virginia are represented in the House by solid Democratic delegations. With judicious nominations and proper effort the Republican party can reclaim one or two districts from Maryland and West Virginia, and possibly one from Kentucky that formerly belonged to it. Let us make the effort.

THE NATIONAL REPUBLICAN desires briefly to say to the Sunday Herald that it wanders from the truth when it alleges that JOHN L. VANUE has been slandered, either directly or by innuendo, in these columns All that THE REPUBLICAN has said is fully justified by the facts of the case. We repeat: If VASCE is insome now he undoubt-edly was equally so while in Congress, and we now cheerfully conceds to his singular conduct that mantle of charity.

Now comes the fiver and Harbor bill to put to shame and expose the bogus economy of the Democratic House. It retreached last year by not making any appropriation for river and harbor traprovements, and, as four the whale has availowed Joxall, or a consequence, is compelled to appropriate Joxall, the whale; or which is JOXAII, or nearly \$7,000,000 this year much of which sum is required to make good the damage which has been subjected to the pro-occasioned by last year's parsimony and begleet. And this is called Economy and Re-

Wirm the facilities afforded them of constant and immediate access to the Treasury, and with gold at our-fourth per cent, premium, the present opportunity to resume specie payment by the banking institutionof the District should not be neglected Open the vaults and pour out the yellow chiners. Make money plentiful and busi ness will revive. A revival of business will increase the profits and usefulness of the banks. Who speaks first?

We would like to have some twenty or more political theorists at in the gallery of the House to-day and note the objections of Northern Democrats, looking out for a return at the fall elections, to the passage of private bills for the relief of Southern clairs ants on first presentation from the commit tees. What does it all mean? The effect of such objection is, at the most, simply deferring the bill till next wasion, when their ies of re-election will have been decided. How will they then your?

ADMIRAL OF ROBAN'S Interesting article in yesterday's Sanday Garette on the British navy concludes with the incontrovertible

meerion:
"The navy is always popular—a very natural result of England's vast commercial enterprises in every corner of the globe—and so it must be with any nation that aspires to or tensive trading."

The natural deduction from this asser-

tion, applying it to the present situation in the Cuited States, is that this country does not aspire to extensive trading, for the condition of our navy would indicate that it is far from popular. This is a mistake, howfar from popular. This is a universal of ever, for there is no patriotic scuttment on dear to the American heart as the thought step.

Control of the American heart as the thought step.

Control of the matrices of the step. Stripes, floating over the opens of the world, commanding respect and admiration as the emblem of our great and free nation slity. But seeingogism, political fealousy,

time to withhold proper encouragement to our merchant marine. As a nation we certainly do aspire to extensive trading; but our national legislators have hampered that espiration in every conceivable way. It remains to be seen whether they will make mends by prompt, considerate, and favorable action regarding measures for the relief of our stagnated shipping interests now pending before them.

So harmoniously did they work together, so admirably were the plans arranged and consummated and the troops ould and dismissed to their homes, that Europe was amazed at the spectacle. No noise, no confusion, no disturbance; but harmony, promptness, and peace. Of course, the clerical force of these Bureaus was reduced years ago; but the work now suffers from a lack of elerical capacity, of which they are sadly deficient. And yet Mr. BASyryo would do worse by consolidating Bureaus entirely distinct, which would only lead to confusion and disaster. His bill is a libel upon the intelligence of the American people and merits the oblivion it will surely

"The practicability of resumption has been itself instanced here in various ways to-day. At sub-treasury a \$29 gold piece came in to be exchanged for currency, and three coin check issued by the collector of customs were deposited by a bank as currency. Gold is beginning to pain out by merchants quite freely. both the companies and the Government. Well, this precious committee, which has shown such a suspicious regard for the national Treasury in one case as to disregard the Constitution in its behalf, has consistently shown its further disregard for the organic law and common business sagacity by agreeing (seven to six) to report a bil indersing nearly \$39,000,000 of fifty-year gold bonds for the Texas Pacific company.
